

Dissertation
submitted to the
Combined Faculties for the Natural Sciences and for Mathematics
of the Ruperto-Carola University of Heidelberg, Germany
for the degree of
Doctor of Natural Sciences

presented by
M.Sc. Eleni Katragkou
born in Athens

Oral examination: 26.11.2003

Aircraft based measurements
of atmospheric Sulfur Dioxide and
ground based measurements of gaseous Sulfur (VI)
in the simulated internal flow of an aircraft engine:
Implications for atmospheric aerosol formation

Referees: Prof. Dr. Frank Arnold
Prof. Dr. Bernd Jaehne
