

Formylium as a tracer of circumstellar disks physics

Formylium as a tracer of circumstellar disks physics

Grigori Smirnov-Pinchukov

The art used on the cover was generated with an AI text-to-image generator DALL-E 2 by OpenAI in October 2022.
The prompt used was
"a very very very beautiful yellow planet-forming disk around a star, black background, oil on canvas, digital art",
with an unintentional typo in the word "planet".
The central picture on the back cover was used to "generate variations" to produce other images.
The background was removed with the Free Image Background Remove tool by Adobe.

Thanks AI for supporting my research!
