

infra-dmp and DMP4NFDI

For Data/Software Management Plans in the NFDI

infra-dmp

Standards for DMPs/SMPs across the NFDI

*infra-dmp has
several Sub
Working Groups*

Vision for DMPs in the NFDI

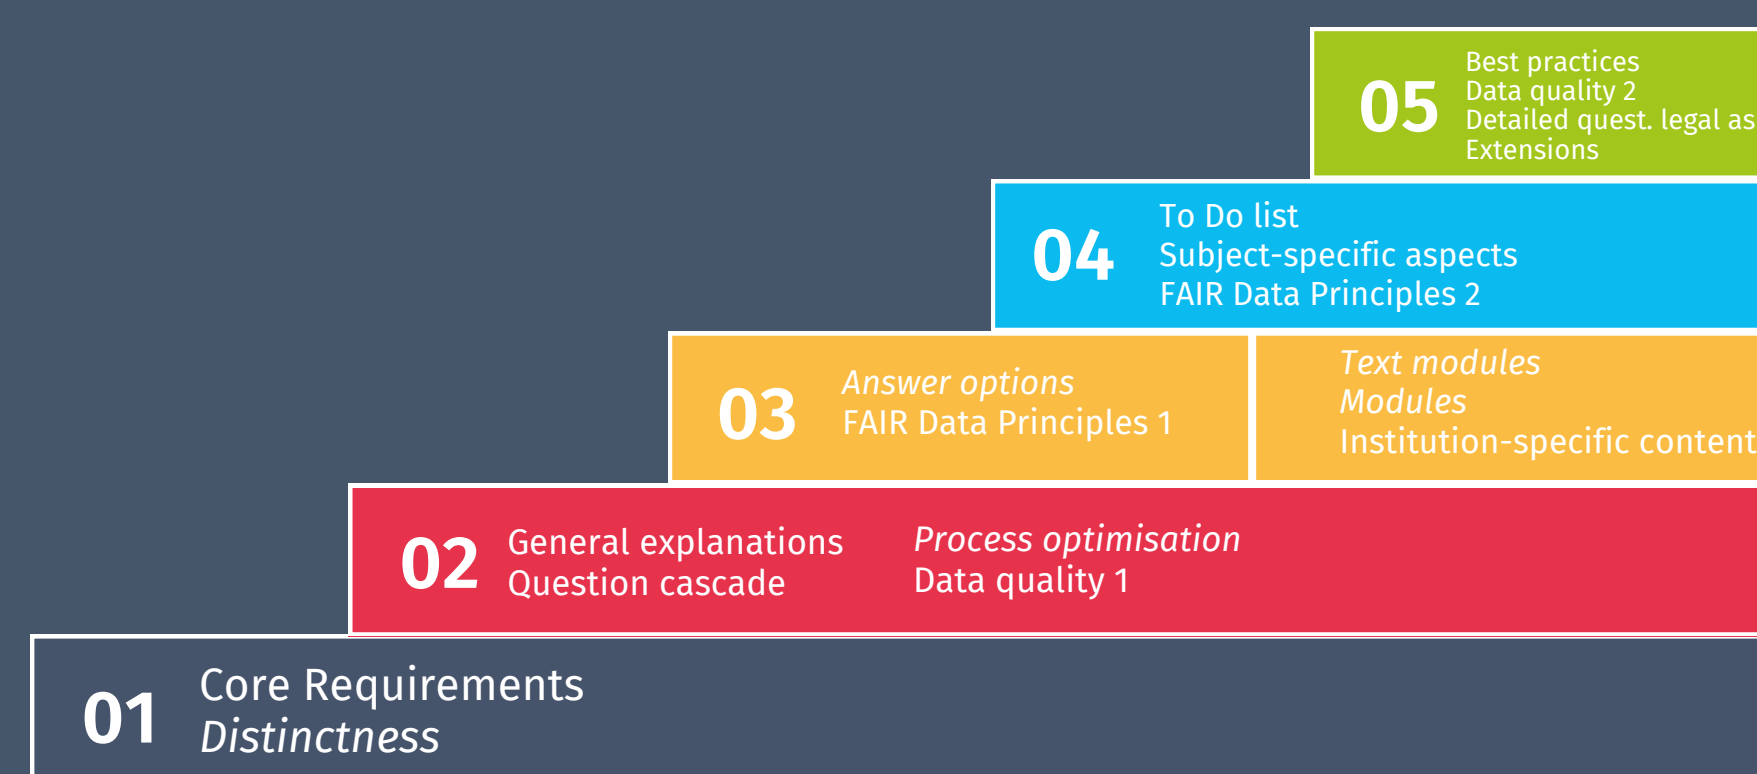

*read more
here*

- Support communication between stakeholders
- Simplification of the application and review process
- Integration into research process
- Making DMPs easier to complete
- Support strategic management

Quality Criteria for DMP Templates

*read more
here*

Criteria for DMP Evaluation

Checklist for data stewards and researchers to review DMPs

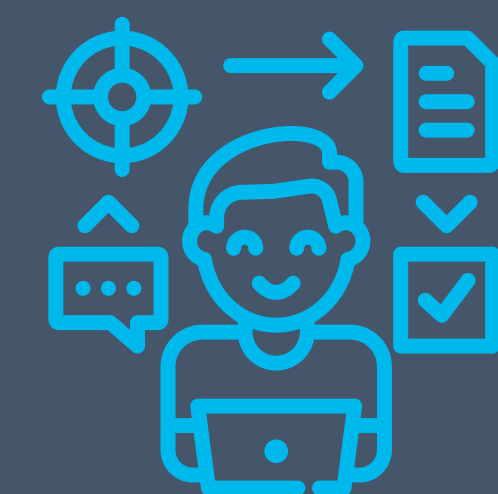

Recommendations for Green DMPs

Recommendation on DMPs for ecologically sustainable RDM

DMP4nfdi

Service for DMPs/SMPs across the NFDI

*a basic service in the
NFDI that originated
from an infra-dmp Sub
Working Group*

Technical Infrastructure

RDMO-Platform

- Central hosting with clients for the consortia

Features

- Collaborative template development
- Machine readable DMPs/SMPs

Service Integration

- API & plugin architecture to integrate RDM services

NFDI DMP Template Framework

Standards in DMPs/SMPs

- Interoperable template framework
- DMP/SMP modules, adaptable for consortia
- Centralised interoperable vocabulary

Integration with International Initiatives and Standards

- Aligned to international schemas and technologies

Training & Support

Train-the-Trainer Workshops (DMPs, SMPs, RDMO)

- Use of the NFDI DMP Template Framework
- OER Training materials

Support

- Support for template development and outreach
- Knowledge base (FAQs, best practices, etc.)

Get in touch with DMP4NFDI for support on DMPs/SMPs for your consortium

Get involved!

Join the NFDI working group infra-dmp to share your ideas on DMPs/SMPs in the NFDI
